

# Refined Naphthalene

## Product Datasheet

Refined Naphthalene is obtained by further processing crude naphthalene. It is a white or light yellow, flaky or powdery crystal, is easily volatile, and has a special aromatic smell. Refined naphthalene is highly sublime and does not dissolve in water but can dissolve in benzene, alcohol, ethers, chloroform, carbon disulfide, etc.

### APPLICATIONS

Used in manufacturing of SNF, beta naphthol, phthalicanhydride, tanning agents, moth balls and domestic disinfectants

Used by the dyes, chemicals and pharmaceutical industries

### PERFORMANCE

Refined Naphthalene purity improves the yield of H Acid

Naphthalic anhydride manufactured of Naphthalene is of better quality as compare to made by Ortho Xylene

### TYPICAL QUALITY PROPERTIES

Test Parameters	Unit	Testing method	Specifications range
Crystallizing Point	°C	IS - 539	79.4 Min
Purity	%ww	GLC Method	98.6 Min
Moisture Content	%ww	IS - 539	0.2 Max
Ash	%ww	IS - 539	0.02 Max
Matter Insoluble in Benzene	%ww	IS - 539	0.1 Max
Non Volatile matter at 160°C	%ww	IS - 539	0.1 Max
