

Specification – PAABSA

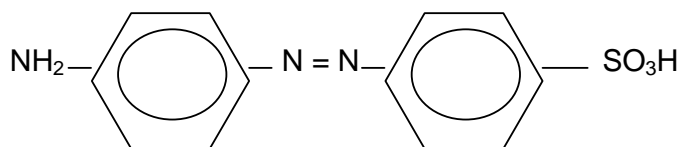

Chemical Name : 4 - Amino Azo Benzene – 4' - Sulfonic Acid

Synonym : Para Amino Azo Benzene – Sulfonic Acid

Trade Name : PAABSA

Molecular Weight : 277 Grams/Mole

Structural Formula :

Purity : Min.93%

Insolubles : Max. 0.40%

Solubility : Clear Solution in Alkaline Solution

Mono Azo Content : 0.30%

PAAB Content : 0.20%

Total other Isomers : 0.50%

Physical Appearance : Light Pink Dry Powder

Basis of Sale : On 100% real basis

Packing : 25/50kgs HDPE bags with PE Liners inside
